

Amendments to the Specification:

Please replace the paragraph, numbered [0019] with the following:

[0019] FIG. 2 is a side elevation view, figuratively, of the preferred embodiment of the present recycling invention comprising a vibrating screen system (202), and supporting
5 delivery (201) and removal conveyors (206_and 205). The screening system is designed to classify the -4 inch news screen fines (NSF) compressed recyclable material into a less than 2.5 inch fraction (Fraction 1) present at (205) and greater than 2.5 inch fraction (Fraction 2) on to conveyer (206) corresponding to step 106 of FIG. 1. Depending on the material stream, preferred separation screen sizes for screen 1 (S1) may range between
10 2.5 inches and about 4 inches.
